

# KIC InnoEnergy Innovation Projects

New programme for the final technological development of energy solutions

**Do you have a business idea linked to Sustainable Energy that you want to commercialise within the next three to five years but still need complementing support?**

In KIC InnoEnergy you will find the environment to finalise your product or service idea and to successfully launch it on the market. We invest in the final development of products and services of which at least the technical feasibility has already been proven, e.g. as a prototype on lab scale (Technology Readiness Level 5).

## What do we offer?

- **Support of the last stage of the go-to-market process** for innovative products and services
- **Stable collaboration**, business-oriented framework for open innovation
- **Substantial KIC InnoEnergy funding** that hedges the risk of your investment
- **Pan-European network** of partners specialised in sustainable energy
- **Clear IP rules** and other business support mechanisms
- **Flexible, professional, business-oriented** management programme
- **First customer for your product** within our European network

## Our technology fields

- **Energy from chemical fuels**
- **Sustainable nuclear and renewable convergence**
- **Smart and efficient buildings and cities**
- **Clean coal technologies**
- **Renewable energies**
- **Smart electric grid**
- **Energy efficiency**
- **Electricity storage**

## Who can apply?

Consortia of at least three European partners including the future partner for commercialisation.

## What do you need to present?

- 1. An innovative solution aiming at one of the following goals:**
  - Decreasing energy cost
  - Increasing intrinsic operational safety or reliability
  - Reducing green house gas emissions
- 2. Successful proof of concept achieved**
- 3. Convincing business opportunity**
- 4. The commercialising partner must be part of the project consortium**

For further information and prior to starting the development of a proposal, please contact our Business Manager Innovation, **Felix Teufel**:

## About KIC InnoEnergy

KIC InnoEnergy is the European company driving innovation, entrepreneurship and education in the sustainable energy field, by bringing together academics, business and research. We are one of the first Knowledge and Innovation Communities (KICs) created under the leadership of the European Institute of Innovation and Technology (EIT). We are a commercial company with 27 shareholders that include top ranking industries, research centres and universities - all of them key players in the energy field.

The EIT is an independent body of the European Union established in March 2008, with the mission to increase European sustainable growth and competitiveness by reinforcing the innovation capacity within the European Union.
