# Clean energy for EU islands forum 20 – 21 May 2021

## CE4EUislandsForum: Exhibitor information

### WHAT IS IT ABOUT?

On May 20th to 21st the **Clean energy for EU islands forum** will take place virtually. It will be the 6th forum of the Clean energy for EU islands initiative, the European Commission's main event on clean energy transition on European islands. Through its exhibitors area, the two-day event will provide visibility to your organisation as well as bringing attention to your contribution to the energy transition of islands.

The different event formats, such as high-level political panel discussions and workshops will connect bottom-up initiatives with high-level political stakeholders at the national and EU level to steer political agendas and set priorities. The exhibition fair showcases clean energy projects and activities on islands to the wider European community and enables exchange between exhibitor and audience. The networking/matchmaking opportunities facilitate the exchange between different stakeholders and facilitate project development.

Become part of the CE4EUislands Forum and apply as exhibitor!

### WHAT'S IN THERE FOR YOU?

- Reach a wide audience within the clean energy sector.
- Showcase your projects and initiatives in the island context.
- Get in direct contact with interested persons and use the networking opportunities.
- Use the platform of the Clean energy for EU islands forum and build a long-lasting network.
- Gain visibility within the EU islands community.

### WHO CAN APPLY AS AN EXHIBITOR?

- Clean energy technology providers
- Investors
- Island networks and organisations
- EU initiatives and projects
- Project developers
- Associations and agencies
- Academia
- Public authorities
