

## WORKSHOP 8:

### Open Innovation Ecosystem for collaborative co-creation (English)

The EU funded innovation projects on "Open Innovation for collaborative production engineering" under Horizon 2020 are a great demonstration of collaborative co-creation. Four projects will present their examples of successful open innovation approaches within their projects and discuss the practical application of their lessons learned beyond the research project.

How can project results be converted into sustainable business models? - This and more will be explored in a summary panel discussion.

#### Agenda of the Workshop:

Moderation and introduction by Meike Reimann | Steinbeis 2i GmbH

Vision and Strategy to Open Innovation of the European Commission  
tbc

OpenNext establishes a company community collaboration for Open Hardware  
Mehera Hassan Ahmed Osman | Technische Universität Berlin, OpenNext

iProduce conceptualises collaborative manufacturing in the Social Manufacturing Framework  
Manuel Sánchez de la Asunción | A IDIMME, iProduce

DIY4U personalises and customises Fast Moving Consumer Goods through an Open Innovation Digital Platform and FabLabs  
Chandana Ratnayake | SINTEF, DIY4U

INEDIT creates an Open Innovation community for co-design in furniture manufacturing  
Laurent Dupont | Université de Lorraine

Business Models in Open Innovation  
Tobias Leiting / Andreas Külschbach | FIR RWTH Aachen

Panel Discussion on Open Innovation in Collaborative Co-creation
